ROLL PRINTS (per linear inch of paper)

How to figure roll pricing: Looking for a **16-by-20 inch print on Enhanced Matte paper?** Find the paper you want first, and then look for roll width (17 inches, since a .5 inch border is required all the way around). Finally, multiply the price by the length (20 inches).

Total cost: \$20

SCANNING / DIGITAL CONVERSION

Bring art in any format: a photograph, film negative, a sculpture...you name it. We scan flat art up to 8-by-10 inches. The Lazarus Group uses Digital ICE © Processing on all scans. Digital ICE © technology automatically removes surface defects such as dust, scratches and fingerprints, without degrading the image. (ICE stands for Image Correction and Enhancement.)

Art that is larger than 8-by-10 inches or 3-D art is considered oversized. We will take a digital photograph of your original using an Imacon 384, 16-megapixel digital camera to photograph your original. The result is a high resolution digital file, giving you the freedom to reproduce your piece at any size... almost.

- Up to 8.5" x 11" \$15 no corrections included (see color correction section for pricing)
- Oversized: \$150 includes color correction, file on disc and up to three proofs (two to three week turnaround)

SLIDES FROM DIGITAL FILES

Not only can we create digital files from just about any format you can think of, we can create photographic slides from your digital files.

- Standard turnaround (7 days): \$6 per slide
- Express turnaround (2 days): \$10 per slide
